

VN Brand Launches New Carry-On Backpack

Design features removable laptop sleeve and security protection

COLUMBUS, Ohio – VN announced today the release of the new carry-on backpack, ideal for those who never travel without a laptop.

This sleek backpack was designed for frequent travelers and young professionals who do not want to sacrifice style for convenience. With a removable, **TSA-approved** laptop sleeve for devices with up to a 13.1” display and extra-large capacity, this bag makes going through airport security simpler than ever. The carry-on offers security protection through the use of **RFID**

material, which protects personal data so that consumers can feel safe while traveling.

Made of strong Nylon fabric and water-resistant material, the bag is both lightweight and durable, making it the perfect traveling companion. The carry-on also features molded **EVA cushioned shoulder** straps for all-day comfort and a revolutionary dual-carrying design that easily converts the bag from backpack to briefcase through the use of a side handle and hidden straps. Combining style, convenience and versatility, the carry-on backpack is the newest way to travel.

The VN carry-on backpack will be available at vnbags.com soon. For more information, please visit vnbags.com.
