## **VN Bags Launch Safe Guard Backpack**

*Unique steel wire technology keeps valuables safe from thieves while traveling*

**COLUMBUS, Ohio** – VN Bags announced today the release of the Safe Guard Backpack, designed to keep travelers, and their belongings, safe and secure.

The bag utilizes revolutionary steel wire protection in the front panel, which prevents thieves from cutting through the fabric to steal valuables, along with an internal pocket made of RFID material to protect personal data. Featuring a removable, TSA-approved lined laptop sleeve for devices with up to a 13.1” display and molded, EVA cushioned shoulder straps for all-day comfort, the Safe Guard

backpack is ideal for frequent travelers.

Made of Nylon fabric with Tarpaulin material on the bottom of the bag, this backpack is both water-resistant and highly durable. Whether consumers are traveling domestically or internationally, the Safe Guard backpack gives travelers security and peace of mind.

The VN carry-on backpack will be available in a variety of colors. For more information, please visit [vnbags.com](http://vnbags.com).
