2021 State of the U.S. Travel Goods Market

Notes, Definitions & Sources

Notes: The retail sales numbers are TGA estimates based on certain assumptions regarding the U.S. travel goods market. Those assumptions are:

- Most of the travel goods sold in the United States are imported. The percentage of the U.S. travel goods market supplied by imports varies depending on the type of product.
- Based on the data available for 2021, TGA estimates that imports currently account for 99% of the U.S. luggage market, 99% of the U.S. business case/computer bag market, 99% of the travel & sports bag market, 99% of the U.S. handbags market, 95% of the U.S. personal leather goods market, 99% of the U.S. backpack market and 99% of the luggage lock market.
- Travel goods are typically imported one of three ways:
 - 1) by a wholesaler, who then sells the product, at a mark-up, to a retailer, who then sells the product, at a mark-up, to the U.S. consumer;
 - 2) directly by a retailer, who then sells the product, at a mark-up, to the U.S. consumer; or
 - 3) by a wholesaler who sells the product, at a mark-up, to a customer who then provides the product for free or at low cost to its customers/clients for promotional purposes.
- In order to reflect the mix of different selling patterns and the estimated mark-up at each step in the process, TGA utilizes multipliers for 2021 of 2.7 for luggage, 2.9 for business cases/computer bags, 2.1 for travel/sports bags, 2.7 for handbags, 2.4 for personal leather goods, 3.2 for backpacks and 2.9 for luggage locks to estimate the retail value of U.S. travel goods sales.
- TGA then applies a similar type of formula to estimate the retail value of U.S. production.

- *Please note that the average unit price for luggage is based on the unit price for each individual piece of luggage, not the unit price for a set.*
- *2019, 2020, and 2021 sales numbers were negatively impacted by punitive tariffs on U.S. travel goods imports from China. The U.S. government imposed 10% punitive tariffs on U.S. imports of travel goods from China on September 24, 2018, and increased the tariffs to 25% on May 10, 2019. The tariffs remain in place as of the date of this publication.*
- *In 2020, 56.0% of U.S. travel goods imports were from China. For comparison, in 2016, before the U.S./China trade war, 84.3% of U.S. travel goods imports were from China.*
- *These punitive tariffs are in addition to the normal imports tariffs on travel goods that average 17.6%-20%.*
- *Further, in 2020, the pandemic not only sent the U.S. economy into a recession but brought travel, the key driver in our industry, to a standstill. The U.S. travel goods market did not start to improve until March/April 2021.*
- *NOTE: U.S. companies pay the tariffs, which are then baked into the retail price of travel goods as a hidden tax on American consumers.*

Definitions:

- **Luggage** – Includes all types of luggage, including luggage sets.
- **Business Cases/Computer Bags** – Includes all types of brief and attaché cases and computer bags as well as school satchels and occupational luggage.
- **Travel/Sports Bags** – Includes all types of duffel bags, totes, garment bags, and all other types of travel and sports bags.

Does not include golf bags, insulated food and beverage bags, or musical instrument cases.

- **Handbags** – Includes all types of women's purses and handbags, except for large tote bags.
- **Personal Leather Goods** – Sometimes described as flat goods or goods ordinarily carried in the pocket or in the handbag. Includes all types of wallets, PDA Cases, cell phone cases, glass cases, business card holders, portfolios, calendar books, CD/DVD cases, cosmetics cases, MP3 player cases, etc., regardless of the material on the outer surface (leather, plastic, textile).
- **Backpacks** – Includes all types of backpacks (except leather backpacks and computer case backpacks) regardless of end use (i.e., school, travel, hiking, etc.).
