Make a Splash with the Pacsafe® Dry Series

New Dry Collection protects against theft and the elements

Seattle, WA – January 2, 2018 – From island hopping adventures to camping by mighty rivers to soaking up the sun on the beach, the new Pacsafe® Dry Collection protects belongings from getting wet or stolen by combining their trusted anti-theft technology with water-resistant material for all-around security for amphibious adventures.

The Dry Collection's four styles range in size from four-liters to 36-liters, providing a water-resistant bag for every excursion. The series is available in three stand-out colorways: Charcoal, Sand, and Orange.

Collection Highlights

The collection features a **Stash Bag** (4L) that can be used on its own as a clutch or a toiletries bag and can be clipped onto the larger bags for additional storage, a **15L Portable Safe** that can be used as a backpack, a **25L Backpack**, and a **36L Beach Bag**.

The bags are constructed with **high-frequency heat welding** and fitted with **high-frequency sealed seams** and **YKK water-repellent zippers**. While designs are not built for prolonged submersion, they will withstand heavy rain and splashes. The 15L Portable Safe was put to the test. The bag was sprayed for three minutes with a high-powered jet spray and contents inside the bag remained dry earning the IPX6 Waterproof Standard score. The 25L Backpack and 36L Beach Bag have a wet-dry pocket for separating wet and dry gear. All Pacsafe® bags are manufactured without the use of harmful PVC.

Smart Security Features

The Pacsafe® Dry Collection delivers innovative anti-theft protection through smart zipper security with **interlocking zip pullers** and the **Roobar™ Deluxe locking system**, which forms a lock-down security point to ensure protection against pickpockets and unwanted bag access. To guard against cut-and-run theft, bags are fitted with wire-reinforced, **Carrysafe® slashguard straps**. To help combat the threat of identity theft and to keep your ID and credit cards safe from scan scams, all bags feature an **RFIDsafe™ blocking pocket** (10Mhz – 3GHz).

Additionally, the 15L Portable Safe is equipped with the **360° eXomesh® locking system**, for the ultimate in cut-and- run protection.
